

## PESTICIDE USE LABELING REQUIREMENTS

Section 6602. Title 3 of the California Administrative Code states:

“6602. Availability of Labeling.

A copy of the registered labeling that allows the manner in which the pesticide is being used shall be available at each use site.”

The lures for Oriental fruit fly and melon fly contain dibrom. Dibrom product labels and material safety data sheets (MSDS) are available from the county agricultural commissioner. The dibrom product label, the Special Local Need (SLN) registration and the MSDS must be in the possession of each trapper at the time the wick is baited. The SLN document is reprinted on the following pages. MSDS sheets are available through the CDFA Meadowview office in Sacramento.

**California Environmental Protection Agency**

James M. Strock, *Secretary for Environmental Protection*

**State of California**

Pete Wilson, *Governor*

**DEPARTMENT OF PESTICIDE REGULATION**

James W. Wells, *Director*

Sacramento, California 95814-5604

SLN #CA-760221

November 6, 1995

**REGISTRATION FOR SPECIAL LOCAL NEED AMENDED\*  
FOR DISTRIBUTION AND USE ONLY WITHIN CALIFORNIA**

Trade Name: Valent Dibrom 8 Emulsive      EPA Reg. No.: 59639-15-AA

Firm Name: Valent U.S.A.

**DIRECTION FOR USE**

It is a violation of federal law to use this product  
in a manner inconsistent with its labeling.

Location: Statewide

Crop/Site/Commodity: For use in insect traps.

Target Pest/Problem: Fruit flies in the family Tephritidae.

Dosage: For initial baiting, apply 5 milliliters of appropriately diluted product (see dilution rate) to absorbent wicks which are part of insect traps. An additional 2 milliliters of diluted product may be added to the wick at not less than 10 day intervals. See Frequency/Timing below for additional information.

Dilution Rate: Dilute product to 1, 5, or 25 percent active ingredient with an approved<sup>2</sup> lure for the target pest. Ordinarily, a 1% mixture is used for oriental fruit fly detection trapping, and a 5% mixture is used for melon fly detection trapping. A 25% mixture is used for eradication trapping. For one quart of:

- 1% Mix 0.5 ounces (15.2 ml) of product with 31.5 ounces (930.8 ml) attractant.
- 5% Mix 2.6 ounces (76.3 ml) of product with 29.4 ounces (869.7 ml) attractant.
- 25% Mix 12.9 ounces (381.5 ml) of product with 19.1 ounces (564.5 ml) attractant.

<sup>2</sup>The California Department of Pesticide Regulation requires that insect lures used for pest eradication (versus detection) be registered.

\* This label supersedes the SLN label issued October 17, 1995.

Method of Application: Apply diluted material to wicks using an appropriately calibrated dispenser, such as a dropper or syringe.

Frequency/Timing of Application: After initial baiting, an additional 2 milliliters of diluted product may be added to wicks at intervals of approximately 10 or more days. If previously applied material has crystallized, do not add more material. Replace the wick with a new one and 5 milliliters of appropriately diluted material.

Field Reentry After Application: Not Applicable

Preharvest Interval: Not Applicable

Other Requirements: Applications listed in this registration are for California pest detection, quarantine and eradication purposes only, and must be conducted by or under the direct supervision of a federal, state, or county authorized personnel.

Valid until withdrawn, suspended or cancelled by the United States Environmental Protection Agency (USEPA), the manufacturer, the 24(c) registrant, or the Department of Pesticide Regulation.

All applicable directions, restrictions, and precautions on the USEPA-registered label(s) are to be followed.

This labeling must be in the possession of the user at the time of pesticide application.

The County Agricultural Commissioner's (or designee's) signature must be obtained prior to this use. This does not constitute a recommendation of the Department of Pesticide Regulation and will not prevent quarantine action if illegal residues are found on or in the crop.

Neither the Department nor the county agricultural commissioner, the manufacturer or formulator makes any warranty of merchantability, fitness of purpose, or otherwise, expressed or implied, concerning the use of a pesticide in accordance with these provisions. The user and/or grower acknowledges the preceding disclaimer and accepts liability for any possible damage resulting from this use. Do not use in mixture with other pesticides unless provided for in the labeling. Trial on a small area to check out unanticipated problems is suggested.
